

COGCC has approved a sundry notice submitted by Shell for the Seibert well site. The sundry notice asks to change the horizontal well bore direction from north east to North West. This will keep the well bore in township 8 and go close to the lease line. The formation of the Farisita unit is why this is allowable. Further information can be obtained on the COGCC web site. Any questions you can contact the Huerfano County LGD at lgd@huerfano.us
